SUMMARY

Computer Science graduate from BRAC University experienced in developing full-stack web applications using Flask, React, Next.js, TypeScript, and SQL databases. Built applications featuring authentication, REST APIs, administrative dashboards, and real-time communication, alongside academic research involving OCR and machine learning.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, TypeScript, Java, SQL, C/C++
Frameworks & Technologies: React, Next.js, Flask, Node.js, REST APIs, HTML, CSS, Jinja2, Flask-SocketIO
Databases & ORM: PostgreSQL, MySQL, SQLite, MongoDB, SQLAlchemy
Developer Tools: Git, GitHub, Docker, Vercel, Render
Machine Learning & Data: PyTorch, scikit-learn, pandas, NumPy, EasyOCR, CNN, LSTM/BiLSTM

THESIS & SELECTED PROJECTS

Mortality Risk and Health Suggestions for Critical Patients Using Extended LSTM and CNN *Final-year thesis · 2026*
GitHub: github.com/muazibneashraf/ICU_Analyzer

- Developed a Flask/SQLAlchemy research prototype for ICU report uploads and OCR-based extraction of clinical data.
- integrated authentication, report-review, document-sharing, role specific workflows for administrators, doctors, and patients.
- Proposed a CNN-LSTM/BiLSTM mortality-risk architecture; documented requirements, testing, ethics, and limitations.

LifeLine *Course group project · 2025*
GitHub: github.com/Pranto-Roy-10/LifeLine | Live: lifeline-rlf3.onrender.com

- developed a Flask community-help platform with assistance requests, offers, location maps, and real-time chat.
- Worked with Flask-SocketIO, SQLAlchemy, session/JWT authentication, and SQLite/PostgreSQL in a shared codebase.

Portfolio & Content Studio *Personal full-stack project · 2026*
GitHub: github.com/muazibneashraf/muazibneashraf.github.io | Live: muazibneashraf.vercel.app

- Developed a full-stack server-rendered portfolio and content editor with Next.js, React, and TypeScript.
- Implemented authenticated API routes for managing site content and contact submissions from an admin panel.

College Admission System *Personal project · 2026*
GitHub: github.com/muazibneashraf/College_Admission_System

- Developed Flask and SQLAlchemy workflows for admission applications, class fees, and payment-proof review.
- Modularized backend routes, added database migrations, and configured deployment for Render.

EDUCATION

B.Sc in **Computer Science** | Dept. of **Computer Science and Engineering, BRAC University** *September 2026*
Coursework: Software Engineering, Database Systems, Artificial Intelligence, Computer Networks
HSC (Science), 2020; **SSC** (Science), 2018 | **Rajuk Uttara Model College** | GPA **5.00/5.00** in both.

LEADERSHIP & VOLUNTEERING

Senior Executive, Organising and Management | BIZ BEE, BRAC University *Jan 2022 - Jan 2025*
Volunteer | Ashia Foundation *Nov 2018 - Present*
Languages: Bangla (Native), English (Conversational)
